

Liquefied C4

Used to co-produce (MTBE) and alkylates in the process of feeding a hydrocarbon feed stream containing C4 hydrocarbons to a dehydrogenation unit to create a dehydrogenation product containing C4 olefins

Specifications

Isobutane content	0.42
N-butane content	1.66
Butene content	1.44
N-butene content	3.36
Isobutene content	6.85
Maleic anhydride content of maleic anhydrides	6.22
1,2-butadiene content	5.93
Content of 1,3-butadiene	42.94
Propine + C5 content	1.09
Ethyl acetylene content	25.01
Vinyl acetylene content	4.48
Impurities	0.60

Transportation

Shipment in sealed gas tankers
